

# FRESH-AIRE UV™

## UV LIGHT DISINFECTION SYSTEMS

### 1. APCO™ In-Duct Air Purifier

More effective than traditional PCO technology on more complex VOCs such as formaldehyde or toluene, APCO™ combines UV light with an advanced absorptive photocatalytic oxidation (APCO) monolithic cell. The cell is regenerative, breaking down the captured impurities to simple carbon dioxide and water vapor.

### 2. Blue-Tube UV®

Our most popular product. Everything needed for installation is in the tube. Just connect to a low voltage 24 VAC transformer and install the UV light where needed.

### 3. Fresh-Aire UV Purity™

Our whole-house germicidal ultraviolet light and filtration system offers the ultimate enhancement to indoor air quality. The system features 4" filtration, UV sterilization, and PCO odor neutralization in a stackable filter housing.

### 4. Fresh-Aire UV AHU™

Our water-resistant Fresh-Aire™ germicidal UV lamp system combined with a 110-277 VAC electronic power supply. Remote waterproof mounting for low maintenance. Includes lifetime power supply warranty. Single, Dual, Triple and Quad lamp designs are available.

### 5. Fresh-Aire UV-Filter™

A complete UV light & filter combination unit including special UV reactive filter media. Fits in standard 1" filter slot. The filter media is designed to increase the UV lights' ability to react with captured particulate and greatly reducing airborne pathogens.

### 6. Mini-UV System™

Our smallest UV light system for mini-splits & other limited-space applications features a miniature shielded UV lamp only 9" long with a 3/8" diameter - small enough to fit in the tightest of spaces.

### 7. Fresh-Aire UV Commercial Series™ Adjustable Modular Rack System

Internal installation up to 12' x 12' coils. Larger sizes available. Easy, flexible installation with advanced multi-voltage water resistant power supply featuring the Triatomic lifetime power supply warranty. This system effectively kills mold, bacteria, and viruses in HVAC equipment.

### 8. Fresh-Aire UV Commercial Series™ Panel Mount System

External installation up to 4' x 4' coils. Easy, flexible installation with lifetime warranted multi-voltage water resistant power supply. The panel mount allows installations in the most difficult, hard to reach areas by allowing access to the coil from the outside of the system.

### 9. Fresh-Aire UV Commercial Series™ Tight-Fit Kit™

The Fresh-Aire Tight Fit Kit is ideal for installation into PTACs, Fancoils, and Wall-Mount systems. The kit uses a magnetic mount to easily position the UV lamp for optimum exposure.

### 10. Fresh-Aire ICE UV®

The Fresh-Aire ICE UV germicidal ultraviolet light system works around the clock, killing germs and reducing ice machine maintenance. The Teflon® coated lamp and remote 110-277 VAC power supply allow the lamp to be positioned at the ice tray.
